

APS[®]

High Technology Cables
& Connectivity Solutions

Tele & Data

The company

AP Solutions Ltd (APS®) is the Finnish company that made its name internationally as the specialist in the design and manufacturing of high technology cables and cabling solutions for communications.

With over 20 years of experience, a lean organization structure, and a solid presence in international markets, APS® has what is needed to answer the call as a dynamic company capable of offering standard and custom solutions to meet the needs of demanding customers and a variety of applications.

Our R&D process, just like our design, manufacturing and testing abilities, is organized by focusing on cables that can transfer voice and data to the most diverse of environments, including Telecommunication & Data, Transportation, Ship Building, Oil & Gas, Electronics, Audio & Video, and Defense to name just a few.

We place a high value on customer service and make ourselves available whenever and wherever our customers need us. Each of our branches employ personnel with a background in physical installation, allowing us to go on-site with the customer to help them with the planning, maintenance and trouble-shooting phases.

Since 2014, AP MOG Solutions Pte Ltd, Singapore has served our customers throughout Asia and has focused on developing our business within the region. Continuing our efforts in international development, the younger AP Solutions Kenya Ltd, Kenya, was established in 2017 to expand our presence on the African continent.

Local Area Networks

FTTx and Access

Data Centre

Surveillance (CCTV)

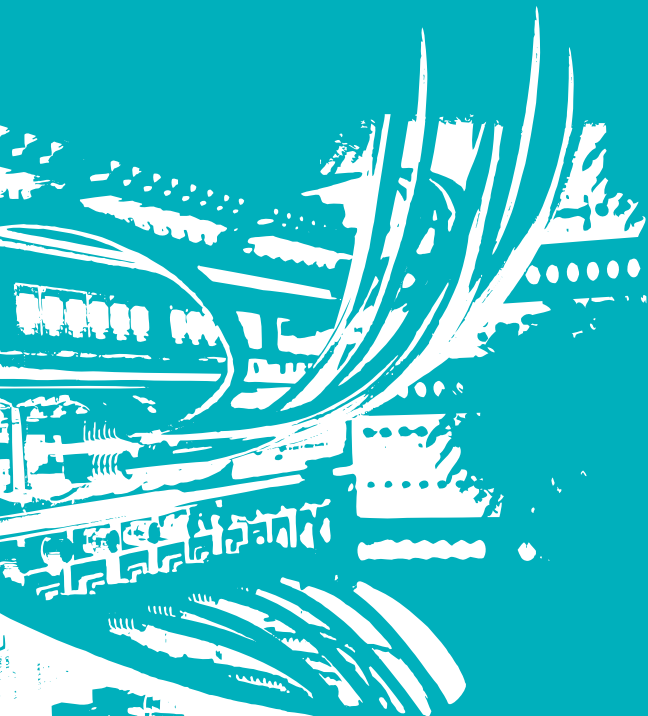

Local Area Networks

At APS we have decades of experience in manufacturing cables and components as well as in installing and maintaining cabled and wireless networks.

Our experts have designed Structured Cabling Solutions for Local Area Networks based on the Company's key principles of Quality, Simplicity and Peace of Mind which translates into top materials, high performance, ease of installation and extended time warranty.

APS Permanent Link solutions are available as unscreened and screened in Category 5e, 6, 6A, 7 and 7A as well as Fiber Optic Singlemode and Multimode.

The system performance is guaranteed by a 25 years warranty when the network is installed by an Installation Partner accredited by APS.

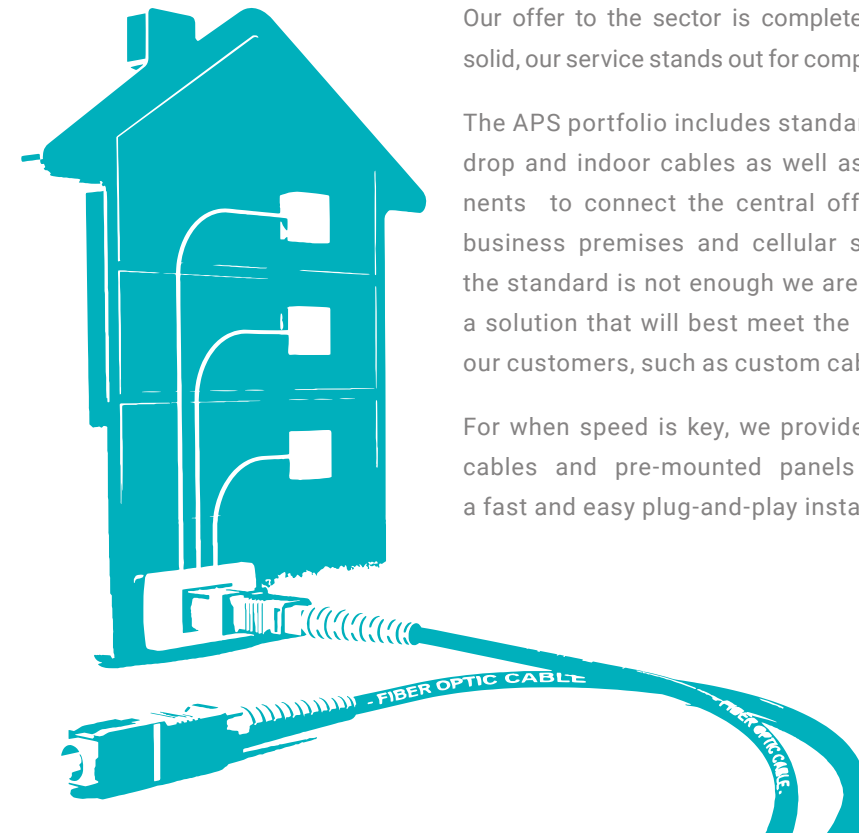

FTTx and Access

At APS we do understand FTTx networks. Since 2005 we have been helping our customers to build their infrastructures in the most diverse of environments, from tropical to arctic countries.

Our offer to the sector is complete, our knowledge solid, our service stands out for competence and care.

The APS portfolio includes standard outside plant, drop and indoor cables as well as all the components to connect the central office, private and business premises and cellular sites. And when the standard is not enough we are ready to design a solution that will best meet the requirements of our customers, such as custom cables or cabinets.

For when speed is key, we provide pre-terminated cables and pre-mounted panels and racks for a fast and easy plug-and-play installation.

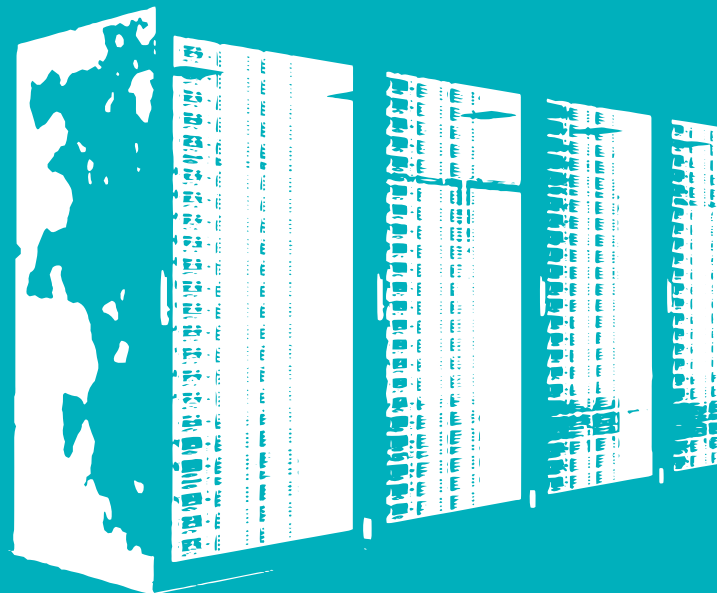

Data Centre

Our team of experts support Data Centre customers with a comprehensive expertise that goes from planning and designing to complete and scalable high-density solutions cable to rack, to an always caring post sales support.

APS®' offer to Data Centres include copper cabling systems Category 6A, 7, 7A and fiber optic cabling systems Single and Multi Mode with MPO, MTP, LC or SC terminations, pre-terminated cables, Racks and Power Distribution Units. Standard and custom products can be combined into diversified solutions to meet the always specific technical or budget exigencies.

When installed by an accredited APS® partner, the network will be completed by a 25 years warranty.
